

Installing Refined Mobile for Confluence Server

1

Go to: General Configuration > Find new add-ons

2

Search for: Refined Mobile

3

Click on: Free Trial or Buy now button

4

Disable bundled Confluence Mobile Plugin like this: [Disable the default Confluence mobile plugin](#). Doing this will improve the user experience.

5

Done!

Accessing Confluence on a mobile device should automatically load the Refined Mobile interface. If you want to visit the mobile interface on any browser, point your mobile browser to: yourdomain.com/m.
