

Upgrade guide

Upgrade from version 2.x

1. Check if the [RefinedWiki Mobile Interface](#) is compatible with your Confluence instance.
2. Make sure that your Confluence instance is fully [backed up](#).
3. Go to: Confluence admin > Manage Add-ons > RefinedWiki Mobile Interface. Click on the upgrade button. Or manually upload the plugin file.
4. If you have specified a "Default start page" at the mobile configuration page, please follow [these instructions](#).
5. If you have customized the look and feel of your mobile interface you need to apply your customization with the new [theme editor](#).

Upgrade from version 3.0-beta1 and 3.0-beta2

If you have first installed 3.0-beta1 or 3.0-beta2. You need to manually change the name of the "mobileinterface" directory located in your CONFLUENCE_HOME directory to "rwm". Images and icons are stored in this directory.
